New Special Tool – PIWIS Tester II 000 721 981 90

Attention: **General Manager/ Service Manager/Service Technician**

Tool Number: **9819**

Part Number: **000 721 981 90**

Concern: **PIWIS Tester II Introduction**

Information: The next generation of the Porsche Service diagnostic tool, PIWIS Tester II, has been introduced and will be arriving at your dealership shortly.

The new Panamera can only be diagnosed using this tester. Based on current project planning, all earlier vehicle models will gradually be changed over to the new PIWIS Tester II by the end of 2010. Until then, PIWIS Tester I must be used for older models in the Porsche workshop. Support for PIWIS Tester I will no longer be available once the earlier diagnostic programs have been transferred onto PIWIS Tester II.

When the PIWIS Tester II is distributed, it will contain one basic piece of software. This is necessary in order to start and configure the tester. The PIWIS Tester II comes with operating instructions in both German and English. You will find instructions in other languages in the Porsche Partner Network (PPN) under: AFTER SALES, Workshop, PIWIS, PIWIS Tester. The diagnostic software will be sent, starting approx. calendar week 28.

Information:
(cont'd)

Technical Preparations for PIWIS Tester II

Please inform all your service department personnel of this information accordingly.

WLAN

The new tester generation supports wireless operation over WLAN. To use this, you must have a WLAN Access Point that supports WPA2 encryption. This type of encryption will be used exclusively for safety reasons. If this prerequisite is met, the interface to the vehicle (VCI - Vehicle Communication Interface) can also be used as a wireless interface on the vehicle. The following illustration (figure 1) shows one possible network option. To use this, you must have a WLAN Access Point that supports WPA2-PSK encryption.

Figure 1 - Network

Printers

Printers can be connected either locally or over a network. PIWIS Tester I printers are supported.
