

# VEHICLES LIST (Autodiagnosis)

Because of the space limitation, the information enclosed in the present document doesn't describe all the details relating to the model and systems.

More deepen information could be obtained by switching the instrument on and selecting the wished model.

ATTENTION: some of the details listed below may be repeated for same models, because MODEL VERSIONS and ENGINE CODES are not specified in this list.

(!) The sign 'TYPE' identifies the type of autodiagnostic applied on the vehicle:

[A] Advanced self diagnosis of ECUs via serial connection.

It is possible to read and delete faults, read live data streams (whether processed by the control unit).

Depending on the system, it is also possible to read statuses, activate components, identify ECU, setting and reprogramming.

[B] Basic self diagnosis of ECUs via serial connection.

It is possible to read and delete faults. For some systems diagnosis runs with manual procedures only.

# VEHICLES LIST

## (Reset Service light)

Because of the space limitation, the information enclosed in the present document doesn't describe all the details relating to the model and systems.

More deepen information could be obtained by switching the instrument on and selecting the wished model.

ATTENTION: some of the details listed below may be repeated for same models, because MODEL VERSIONS and ENGINE CODES are not specified in this list.

(!) The sign 'TYPE' identifies the type of autodiagnostic applied on the vehicle:

[A] Advanced self diagnosis of ECUs via serial connection.

It is possible to read and delete faults, read live data streams (whether processed by the control unit).

Depending on the system, it is also possible to read statuses, activate components, identify ECU, setting and reprogramming.

[B] Basic self diagnosis of ECUs via serial connection.

It is possible to read and delete faults. For some systems diagnosis runs with manual procedures only.
